

Please don't let LPFM stations take priority over current FM translator services. I am talking in particular to a station we get in the Chicago land area called K-Love. I support this station every month to insure I hear Christian music and news with no commercial interruptions. I know a lot of people that listen to this station (example, in the office I work in 5 out of the 9 people that work here listen to this station) and they would be very dissappointed if we no longer we able to get it. It is a very nice alternative to 106.7FM The Fish. I believe K-Love is a much better family friendly station.

Please help make sure we don't loose this station in our area.

Thank you.
